COUNTRY

East Germany

SUBJECT

Liquid Fuel Plant Constructed by the
Mineraloel-Baugesellschaft up to 1945

25X1A

25X1X

1. The following are the liquid fuel plants constructed by the Mineraloel-Baugesellschaft (called Lubag Bauabteilung prior to 1 January 1945) up to 1945:

Plant	Plant Designation	Location	Capacity in 1,000 Tons per Year
<u>High Pressure Plants (Hochdruckwerke)</u>			
Fochlen	A	Bochlen/Leipzig	220
Lagisburg	B	Stationssee/Lagisburg	220
Reitz	Re	Fredegaritz/Leitz	280
Sachsenburg	So	Sachsenkuchen-Horst	315
Volkmann (sic)	St	Volkmann area	180
Zeelitz	Stett	Zeelitz/Stettin	600
Wiesenberg	Wa	Wiesenberg/Köln	200
Wrex	Wa	Waltham/Wrex (Czechoslovakia)	103
Schlesienbecken	Sch	Schlesien/Heydebreck U.S.	125
Siedler	Si	Siedler/Lessau	

Fischer-Tropsch Installations

Schwarzeide	C	Schwarzeide (Ober-Lansitz)	10
Schaffspitzsch	OS	Schaffspitzsch (Ober-Schlesien)	10
Krupp-Tropfstein	Kp	Krupp-Tropfstein	10
Essener Steinkohle	Es	Essen (Ruhr)	10
Mooschen-Benzin	Mo	Mooschen (Ruhr)	10

Type of Installation Unidentified

Lobau	Ln	Grossenzersdorf/Vienna
Kherson	Kh	Southern Russia

2. Following the destruction of most of the German hydrogenation plants on 12 May 1944, work was speeded up on the construction of subterranean liquid fuel plants; the following are the plants in question: 1/

Plant	Plant Designation	Location
Schwalbe I	Schw I	Bordeshausen/Leipzig
Schwalbe II	Schw II	Ludwigsdorf (Kreis Iserehna)
Schwalbe III	Schw III	Albrandshausen/Leipzig

CLASSIFICATION SECRET

25X1A

25X1A

3. In 1944 and 1945 the Mineraloel-Laugesellschaft, in conjunction with the Arbeitsstab Ceilenberg, worked with great haste on about thirty or forty small distillation installations bearing the code name "Ofen" and on approximately thirty to forty installations for obtaining fuel from oil shale; the latter were constructed under the code name "Hueste". 1/
4. In addition to the liquid fuel plants listed above, in the construction of which the Mineraloel-Laugesellschaft participated, the following additional installations were expanded or constructed in Germany up to the end of the war:

<u>Plant</u>	<u>Capacity in 1,000 Tons per Year</u> 2/
Leuna-Werk, Merseburg	600
Scholven	216
Luetzkendorf (High Pressure)	50
Oppau (Opava, Czechoslovakia)	50
Heydebreck	50
Auschwitz	164
Koosbierbaum (predominantly Flieger-Bi, Iso-Octan, Alkylate)	106
Huels	12
Schkopau	9
Ruhr-Chemie (Fischer-Tropsch)	72
Viktor Rauxel (Fischer-Tropsch)	40
Rhein-Freussen (Fischer-Tropsch)	70
Luetzkendorf (Fischer-Tropsch)	80

25X1A 1/ [REDACTED] Comment. [REDACTED] documents 25X1X
on the subject cannot be obtained.

25X1X 2/ [REDACTED] Comment. The capacity figures listed are general overall figures for liquid fuel; no attempt is made to break them down into AT gasoline, DID gasoline, butane, octane, or lubricant-Diesel oils. Planned or current plant expansion is not taken into consideration.

25X1A 3/ [REDACTED] Comment: Now called Zaluži (Malthauern) near Most (Bruex), the location of the Stalin Works.
